ADC is allocating 5% of it's net profit to an "Earth Tax". This self imposed tax was created to ensure a better environment for future generations. Our goal is to use this fund to support efforts aimed at reduction and clean up of man-made pollution. This includes projects with aims such as - reducing societal consumption of non-renewable fuels; development of alternative, green, low carbon or renewable energy sources. In addition, we hope to promote conservation and sustainable use of scarce resources such as water, land and air; protection of representative or unique or pristine ecosystems; preservation and expansion of threatened or endangered species or ecosystems from extinction; and the establishment of nature and biosphere reserves under various types of protection. For further information visit our web site at www.adc9001.com.
